

# Canton Police Department Safety Reminder

## Number Your Home

### ***Seconds Matter*** to Emergency Service Providers

Properly posting highly visible property numbers on your home and/or property (mailbox, light post, etc.) will allow for prompt response and service from the police, fire and ambulance departments.

Numbers should be visible from the street, reflective, and be at least 3 inches in height. To ensure that approaching emergency service providers can identify the house regardless of travel direction post numbers from both sides of the mailbox or fixture. If you have a snowplow barrier protecting the mailbox post the house number there too.
